What's New In Capture Color Man?

Capture Color Man is an all-in-one screen color picker, allowing you to simply pick a color on any image, and use your mouse to view the specific pixel's RGB and Hexa code, plus the LAB and CMYK value.Key Features: Capture Color Man Lite is a perfect image tool to pick colors on any image, inside the original application interface. The application can be run on all supported platforms, providing the ability to recognize over 2 million different colors, in over 200 languages and formats. It supports more than 40 different languages, such as LAB, RGB, HTML, HSB/HSV, CMYK, HSL, TColor, HEXA, RAINBOW, FRIEDRANG, D2L, etc. With a single mouse click, you can view and save the actual RGB, LAB, CMYK, HEXA, HTML, HSB and HSV values of each highlighted color on the chosen image, also storing each of them in a separate TXT file for reuse, or printing off. When saving a particular color, it will be added to the list, displayed on the left table of the application. With just a single click on the name of that item, you can simply preview and copy it in any text editor, HTML editor or any other desktop application, for exporting the gathered codes. The program is designed to find any color in any image, located anywhere on the screen, and instantly view the resulting RGB, LAB, CMYK, HEXA, HTML, HSB and HSV codes. The application features a color picker which makes it possible to choose the desired item on the screen, so that you can then get your codes stored in the chosen TXT file. The preview allows you to view at your leisure any pixel chosen by the mouse cursor, all with the correct LAB, RGB, CMYK, HEXA, HTML, HSB and HSV values, and even in the most popular RGB variant, to allow you to quickly understand the actual color choice. DrawColorMan - Color Picker is a intuitive software application that allows you to easily pick the color codes inside of pictures. It also saves any picked color code into any specified TXT file, for future use. In this way you can see the codes straight from your desktop application. The application can be used on Windows XP, Vista and 7, 100% fully compatible with each other.
