## Multimedia Keyboard Plug-in For Griffin AirClick USB

- Plug-in simulates keyboard keystrokes to control any application that supports Multimedia Keyboards. - Made for Griffin AirClick USB. - Open architecture: for application developer no change is needed. - It can switch between configurable applications automatically at startup. - You can set the Keyboard to be used when you're in application. - You can also add more applications or change the list of available commands. - It can even shutdown your computer when you're done! - Compatible

---

with Windows XP, Vista and Windows 7 (32-bit and 64-bit). - It has been tested with Windows Media Center and Windows Media Player. - You can set shortcuts for controlling applications in the main menu and also a multiline shortcut! - It can work with any multimedia keyboard like the Griffin AirClick Remote. - Uses Grsecurity Patch Level 3, and is compatible with all versions of Win7. - Compatible with any USB keyboard. - Compatible with Windows XP, Windows Vista and Windows 7. - Compatible with Multimedia Keyboard hardware: AirClick, AirClick+G (Griffin), AirClickC, AirClickU, AirClickH, AirClick+G, AirClickG,

---

AirClickR, AirClick+H, AirClickS, AirClick+H and AirClick+G2 (wireless) by Griffin, Milestone, Logitech and other brands. - Compatible with any other USB keyboard or USB to PS/2 adapter.

Compatibility: This version is compatible with Windows XP (32bit and 64bit), Windows Vista (32bit and 64bit) and Windows 7 (32bit and 64bit).Q: ASP.NET MVC - read and write for an integer field I want to have a field in my database which is an integer, and then read/write this field, is there a best practice for this? I thought of having a small table with all the different values of the integer, but can't really figure

---

out how to retrieve the correct value when reading. A: I agree with gabriel, but there's nothing wrong with creating a small table of your int values. So long as the values are unique in the table you can just look up the value like so: return

```
(int)db.TableName.Where(x => x.Id == id).Select(x => x
```

**What's New In Multimedia Keyboard Plug-in For Griffin AirClick USB?**

Multimedia Keyboard is an external USB keyboard for the Griffin AirClick. It contains multimedia keys and arrow keys for controlling most multimedia applications.

---

How To: When starting a multimedia application in your computer, the Multimedia Keyboard plug-in will intercept keystrokes and send them to the AirClick remote.

Features:

- Intercepts keystrokes from many multimedia applications
- Simulates keystrokes of the multimedia application (arrows, multimedia,...)
- Shortcut keys to control several applications at the same time
- Multimedia keypad can be enabled/disabled, via a custom skin for the AirClick remote.
- Keystrokes for Applications are sent sequentially
- Can shutdown your computer
- Restart your computer
- Can limit what Applications are controllable
- Can use

---

alternate configurational modes: (Standard, with arrow keys, with keyboard) - Can use different skins for the AirClick remote - Sends notifications on keystrokes - Has always received all keystrokes, no matter what version of Multimedia Keyboard plug-in is used NOTE: To activate the Multimedia Keyboard plug-in, go to Start -> Run and enter the following command:

`%multimedia%plug-in%plug-in_version%`

Where `%multimedia%` is replaced with the value of "Multimedia Keyboard" in your Multimedia Keyboard plug-in, `%plug-in` is replaced with the version of your plug-in, and `%plug-in_version` is replaced with the version

---

of the plug-in. Users should always check the Multimedia Keyboard plug-in version prior to purchasing. 1.9.0 (2008-10-17)

----- -

Compatibility This plug-in is compatible with the latest version of Multimedia Keyboard plug-in, as long as it supports the specific version of Multimedia Keyboard. - Keyboard: Added left-click emulation to "Apple Windows" button, since AirClick does not have this button (instead uses the number 7 button). 1.9.0 (2007-10-23)

----- - Compatibility  
Multimedia Keyboard plug-in is now compatible with the latest version of

---

## Multimedia Keyboard plug-in. 1.8.0

(2007-10-14) ----- -

Compatibility Multimedia Keyboard plug-in is now compatible with the latest version of Multimedia Keyboard plug-in. - New skins: Added "With Keyboard" and "With Arrow Keys" skins for the AirClick remote. - New Skin: The Multimedia Keyboard plug-in now has a new skin, which you can enable/disable. - New Features: The Multimedia Keyboard
