Elden Ring For Windows 2022 [New]

***** 1:Avant-Garde, the Genesis of Fallen Empire In Fall 2017, we released the ELDEN RING online PC game centered on persistent PvP servers. We received a lot of feedback for this release, and as such we decided to break off the scenario of an "unending war," and to create a new "antagonistic vise" system. Through this, the game will become a totally new system, and also provide the first glimpse of a new story plot with a brand new dynamic and feel of game. Avant-Garde was the first project to be developed for the game, and this is the game that started the series as an RPG, and developed a touch of its own style. From this game, we received a lot of valuable feedback, and worked on balancing the game, including the addition of the personal battle, the addition of pets, and the addition of another life, Town, and World map. Avant-Garde is called "Primal" to be preserved as a time capsule of the ORIGINAL ELDEN RING game. Even though the game is "Avant-Garde," we still plan to develop a new story and game in the future. Please look forward to the new ELDEN RING this summer. ***** 2:New Flash Quests We have placed a new emphasis on quests, and have added a new feature. You can now clear quests as you progress, and repeat them if you lose. We have also improved the UI, and have changed it so that the quest items appear in the upper left of the screen, making it easy to find. Thank you for playing ELDEN RING, and please keep playing. Thank you, Dragon Lore. ***** 3:Skill Balance Update We have made some changes to the game so that the skills do not come in all at once, but are acquired gradually. We have modified the overall balance so that it is better suited to the current skill balance, and that it will help the game grow. ***** 4:Cities We have added a new type of city to the game, and have added many more features. We will introduce more cities in the future as well. Thank you for playing ELDEN RING. ***** 5:PvP Battle System Update We have added a new PvP battle
