Mocha TN5250 For Windows 7 8 10 Free Download

What's New in the Mocha TN5250 For Windows 7 8 10?

Mocha W32 TN5250 for Windows 7/8/10 is a terminal emulator for AS/400 access, specially made for computers Windows 10, 8.1, 8 and 7, both 32- and 64-bit architecture types. Those who use Windows XP or older can resort to Mocha W32 TN5250. With support for SSL as well as all standard 5250 emulation features, it's possible to alternate between the 24x80px and 27x132px screen resolutions. After installing and launching the application, you can connect to a AS/400 host and configure advanced settings when it comes to the port to, auto-connect on startup, auto-reconnect, and auto-exit on session termination. Keep Alive messages can be sent one every 15 seconds to maintain the connection operational. Meanwhile, SSL can be activated on port 922 in 56- or 128-bit mode. By right-clicking somewhere on the window, you can paste information in table or Excel format, switch to a different font and colors for the interface, ask the tool to record traffic activity to log files, record macros, as well as reset the terminal. Mocha W32 TN5250 for Windows 7/8/10 is also capable of applying a proxy configuration when establishing the network connection, and automatically log in with your user name and password. Also, you can enable hotspots, use your email client to send messages, as well as opt for a different 5250 function. Mocha TN5250 for Windows 7/8/10 Details: Mocha TN5250 for Windows 7/8/10 allows to connect to the AS/400 host by means of TCP/IP protocol, as well as establish and maintain a virtual terminal connection to the mainframe with an AS/400 system interface. In case the latter is enabled, all 5250 functions are supported, including, but not limited to: Display a cursor to scroll text in the mainframe screen Start and stop text sessions Send messages Rename the terminal Switch between the supported screen resolutions Switch between 24x80px and 27x132px The program allows the connection to the host as well as the emulation of a virtual terminal connection to the mainframe. By default, all buttons, lists, etc. are presented in the default AS/400 green. You can turn on several advanced features as well. Advanced options allow you to: Switch between AS/400 green and black on the terminal screen Activate SSL on port 922 Configure connection to be encrypted or not Setup the connection to run on a specific port Have the application log IP packets Configure a connection to be logged to a file Reset terminal to its default state Record macros and send them to
